Книга Колодаводства

Часть II

В этой работе приведены арки и вежды богов, использование которых в своей жизни дарует человеку свойства того или иного бога. Книга рассчитана на читателей, познакомившихся с работами автора из серии "В поисках сокровенного" и теперь они могут познакомиться с серией «Русская волшебная культура».

Как пользоваться колодавскими таблицами

Здесь приведена «Книга Колодавства» вторая часть, со значениями арок и таланов богов. В качестве арок взяты вежи богов, которые имеют функции бога. Оставшаяся от арки часть окружности, называемая таланом, делится на число бога, входящего в настоящее имя человека. Полученные в результате деления талана – вежды: универсальны и подходят для всех людей, занимающиеся самосовершенствованием в древлеправославной традиции, имеющих в имени одинаковых богов (т.е. одинаковые числа). Назначение таланных окружностей и вежд богов, соединить временные меры бога (веры), входящего в имя человека с функцией бога, которую задумал приобрести человек. Из названия таланной окружности, происходит слово «талант», которое, якобы, произошло от греческих (жреческих) названий денег, что является очередным художественным свистом фальсификаторов, создавшие нам лжеисторию и «русскую» лжекультуру.

Они же придумали, что это слово происходит от греческой меры веса «талант». И в «Новый Завет ввели «Притчу о талантах», в которой говорится о трех рабах, получивших на хранение от хозяина талант серебра. Один закопал свой талант в землю, второй разменял его, а третий приумножил.

Ещё более эффективны таланные окружности, если в качестве арки выбирается рычажная мера человека: вершок, дюйм, палец, ладонь, локоть, плечо, аршин, казая сажень и сажень. В этом случае происходит связь пространственных мер с временными мерами. Тогда арка в таланной окружности называется **аркадой**.

Здесь часто вместо слова бог употребляется старорусское слово багит, которое по смыслу несколько отличается от сегодняшнего распространённого слова бог. Последнее включает в себя все божественные атрибуты: направления, арки, угол, число, чудесное и гармоничное число и т.д. В то время как слово багит означает проявление в человеке бога или его функции, откуда происходит дошедшее до нас слово богатырь, означавшее проявление в человеке функций многих богов.

Пользоваться указанными таблицами достаточно просто. Выберите необходимую вам функцию бога, и найдите в таблицах число вашего бога, входящего в ваше настоящее имя (лучше брать число бога покровителя месяца вашего рождения). В таблицах представлены не только вежды естественных циклов года и суток, но и искусственных циклов: месяца, шестдницы, часа, которые вы можете использовать, если они у вас закручены. Таким образом, отмечая вежи теми или иными одинаковыми действиями, вы постепенно обретёте качества выбранных вами вежд богов.

Следует особо отметить случаи, когда выбранное число, совпадает с числом вежд (с числом бога рождения) минус единица. При таком стечении обстоятельств угол арки (вежи) и угол вежды будут одинаковыми и освоить свойства данного бога придётся через другое число, входящее в одно из наших древлеправославных имён.
